

### **Proposed wind turbines in the Vale of Evesham**

Following the recent announcement from Scottish Power Renewables on the proposed wind turbines for the Vale, I write to strongly object and register my views with you on the proposals.

I have made further enquiries and discovered more on what the impact is likely to be on our daily lives.

My concerns and objections are based upon the location of such monster turbines so close to residential areas and the associated problems of noise, vibration and flicker, not to mention the visual impact on the Vale's landscape.

Whilst I understand the global need for renewable energies, I believe this should be based upon the right technology in the right environment. The Vale is a very unsuitable environment for the turbines.

Please confirm receipt of my letter so that I am assured you have registered my strongest objection to this proposed development.

Yours sincerely,
